Changes are periodically made to the information contained herein and will be incorporated into later versions of the manual. The information contained is subject to change without prior notice.

FCC Warning

This equipment has been tested and found to comply with the limits for a Class-A digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy. It may cause harmful interference to radio communications if the equipment is not installed and used in accordance with the instructions. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

CE Mark Warning

This is a Class-A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Industrial Ethernet Switches

Industrial Grade Gigabit Unmanaged Ethernet Switches

User Manual
Version 2.0 (Aug 2014)

This manual supports the following models:

- LNX-500A
- LNX-500A-T

This document is the current official release manual. Please check our website (www.antaira.com) for any updated manual or contact us by e-mail (support@antaira.com).

Table of Contents

1. Overview

Antaira's LNX-500Aindustrial unmanaged Ethernet switch series are IP30 rated and DIN-Rail mountable. Each unit is designed with five 10/100Tx Fast Ethernet ports, which the RJ-45 interface provides auto detection of MDI or MDI-X, and each port builds with data memory buffers that support the store-and-forward mechanism.

The LNX-500A series provides high EFT and ESD protection to prevent any unregulated voltage and is suitable for harsh environments. It supports the power redundancy feature using a dual power input design with reverse polarity protection.

In addition, the built-in relay warning function alerts maintainers when power failures or port breaks occur.

The LNX-500A series includes two models: one with an operating temperature range of -10 to 70°C, and the other one with an extended operating temperature range of -40 to 75°C. It is a perfectly designed product to fulfill special needs for industrial automation, outdoor applications and harsh weather environments.

1.1 Key Features

- System Interface/Performance
  - RJ-45 ports support auto MDI/MDI-X function
  - Embedded 5-port 10/100Tx Fast Ethernet
  - Store-and-forward switching architecture
  - Port break alarm mask
  - Power line EFT protection: 2,000VDC; Ethernet ESD protection: 6,000VDC
- Power Input
  - DC 12 ~ 48Vredundant power
- Operating Temperature
  - Standard operating temperature model: -10°C ~ 70°C
  - Extended operating temperature model (–T): -40°C ~ 75°C
- Case/Installation
  - Metal / IP-30 protection
  - Installation in pollution degree to environment
  - DIN-Rail and wall mount design

1.2 Package Contents

- LNX-500A(T): 5-port industrial unmanaged Ethernet switch, w/5*10/100Tx
- User manual
- 1-Product CD
- 2-Wall mounting brackets and screws
- 1-DC cable –18 AWG &DC jack 5.5x2.1mm

1.3 Safety Precaution

Attention: If the DC voltage is supplied by an external circuit, please use a protection device on the power supply input. The industrial Ethernet switch's hardware specs, ports, cabling information, and wiring installation will be described within this user manual.

2. Hardware Description

2.1 Physical Dimensions

Figure 2.1, below, shows the physical dimensions of Antaira's LNX-500A series: **5**-port industrial unmanaged Ethernet switch with 5*10/100Tx.

(W x D x H) is **30mm x 99mm x 142mm**

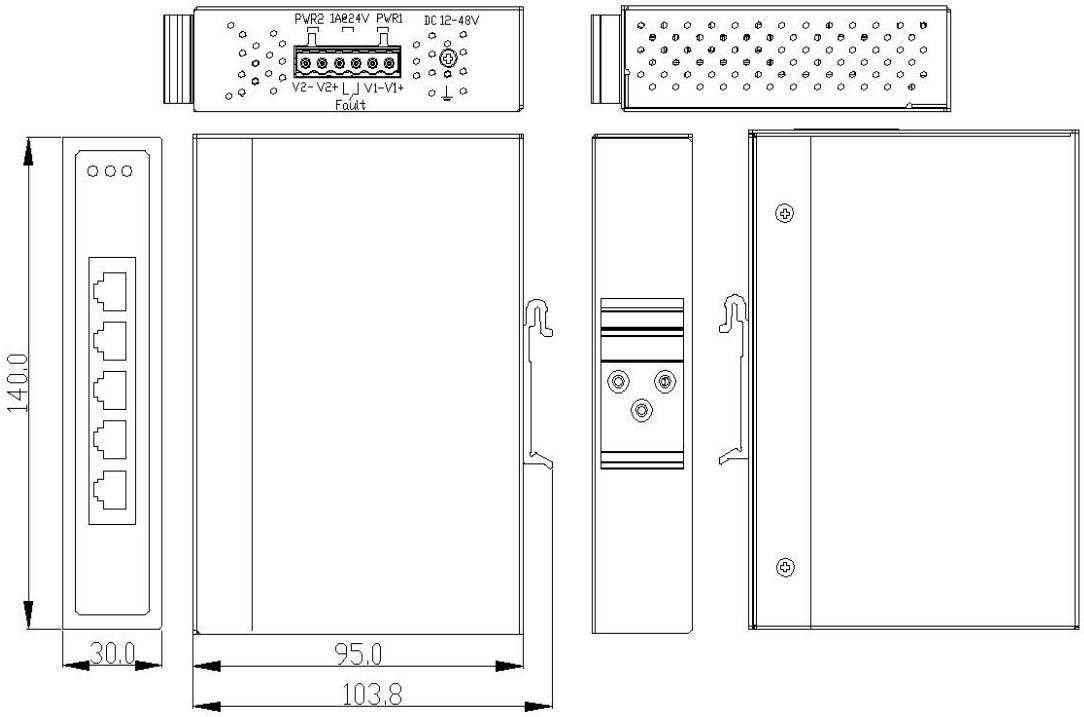

Figure2.1

LNX-500A Series Physical Dimensions

2.2 Front Panel

The front panel of the LNX-500A series industrial unmanaged Ethernet switch is shown below in *Figure 2.2*.

Figure2.2
The Front Panel of LNX-500A Series

2.3 Top View

Figure 2.3, below, shows the top panel of theLNX-500A series switch that is equipped with one 6-pin removal terminal block connector for dual DC power inputs (12~48VDC).

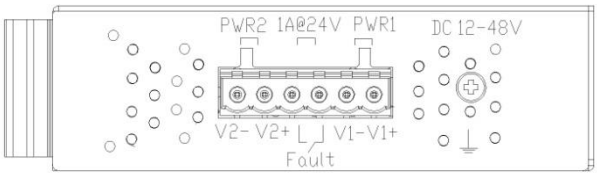

Figure2.3
Top Panel View of LNX-500A Series

2.4 LED Indicators

There are LED light indicators located on the front panel of the industrial Ethernet switch that display the power status and network status. Each LED indicator has a different color and has its own specific meaning, see below in *Table 2.1*.

LED	Color	Description	
P1	Green	On	Powerinput1is active
		Off	Powerinput1isinactive
P2	Green	On	Powerinput2is active
		Off	Powerinput2isinactive
Fault	Red	On	Powerinput1or2is inactive
		Off	Power input1 and 2 are both functional or no power, inputs
Link/Active LAN Port 1~5	Green	On	Connected to network
		Flashing	Networking is active
		Off	Not connected to network
Duplex/Collision LAN Port 1~ 5	Orange	On	Ethernet port full duplex
		Flashing	Collision of packets occurs
		Off	Ethernet port half duplex or not connect to network

Table 2.1
LED Indicators of LNX-500A Series

2.5 Ethernet Ports

- **RJ-45 Ports**

RJ-45 Ports (Auto MDI/MDIX): The RJ-45 ports are auto-sensing for 10Base-T, 100Base-TX devices connections. Auto MDI/MDIX means that the switch can connect to another switch or workstation without changing the straight-through or crossover cabling. See the figures as below for straight-through and crossover cabling schematics.

■ **RJ-45 Pin Assignments**(Table 2.2)

Pin Number	Assignment
1	Rx+
2	Rx-
3	Tx+
6	Tx-

Table 2.2
RJ45 Pin Assignments

Note *"+" and "-" signs represent the polarity of the wires that make up each wire pair.*

All ports on this industrial Ethernet switch support automatic MDI/MDI-X operation. Users can use straight-through cables (see figure below) for all network connections to PCs, servers, other switches or hubs. With straight-through cable, pins 1, 2, 3, and 6, at one end of the cable, are connected straight through to pins 1, 2, 3 and 6 at the other end of the cable. The table below (*Table 2.3*) shows the 10BASE-T, 100BASE-TX MDI and MDI-X port pin outs.

Pin MDI-X	Signal Name	MDI Signal Name
1	Receive Data plus (RD+)	Transmit Data plus (TD+)
2	Receive Data minus (RD-)	Transmit Data minus (TD-)
3	Transmit Data plus (TD+)	Receive Data plus (RD+)
6	Transmit Data minus (TD-)	Receive Data minus (RD-)

Table 2.3
Ethernet Signal Pin Outs

The following figures show the cabling schematics for straight-through and crossover.

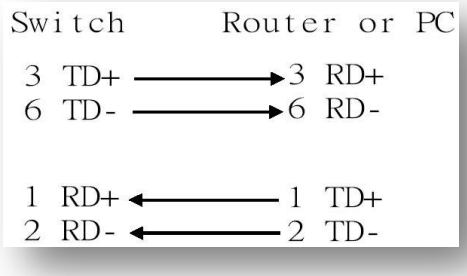

Figure 2.4
Straight-Through Cable Schematic

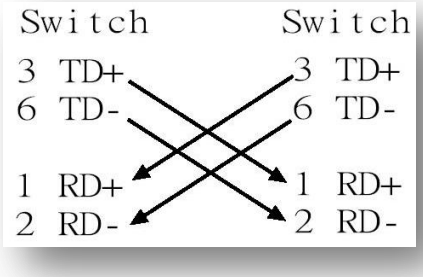

Figure 2.5
Crossover Cable Schematic

2.6 Cabling

Use the four twisted-pair Category 5e or above cabling for RJ-45 port connection. The cable between the switch and the link partner (switch, hub, workstation, etc.) must be less than100meters (328ft.) long.

2.7 Wiring the Power Inputs

Please follow below steps to insert the power wire.

1. Insert the positive and negative wires into the PWR1 (V1+, V1-) and PWR2 (V2+, V2-) contacts on the terminal block connector as shown below in *Figure 2.6*.

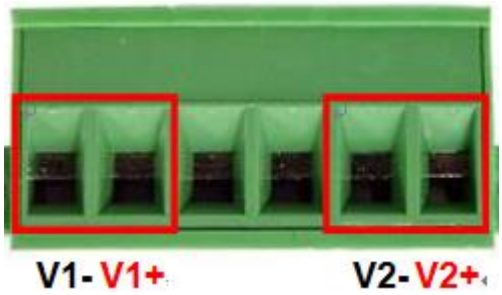

Figure2.6
Power Terminal Block

2. Tighten the wire-clamp screws to prevent the wires from loosening, as shown below in *Figure 2.7.*

Figure2.7
Power Terminal Block

Note	• *Only use copper conductors,**60/75°C**,tighten to **5lbs.***
	• *The wire gauge for the terminal block should range between**18~20 AWG**.*

2.8 Wiring the Fault Alarm Contact

The fault alarm contact is in the middle of the terminal block connector as the picture shows below in *Figure 2.8*. By inserting the wires, it will detect the fault status including power failure or port link failure (managed industrial switch only) and forma normally open circuit. An application example for the fault alarm contact is shown below in *Figure 2.8*.

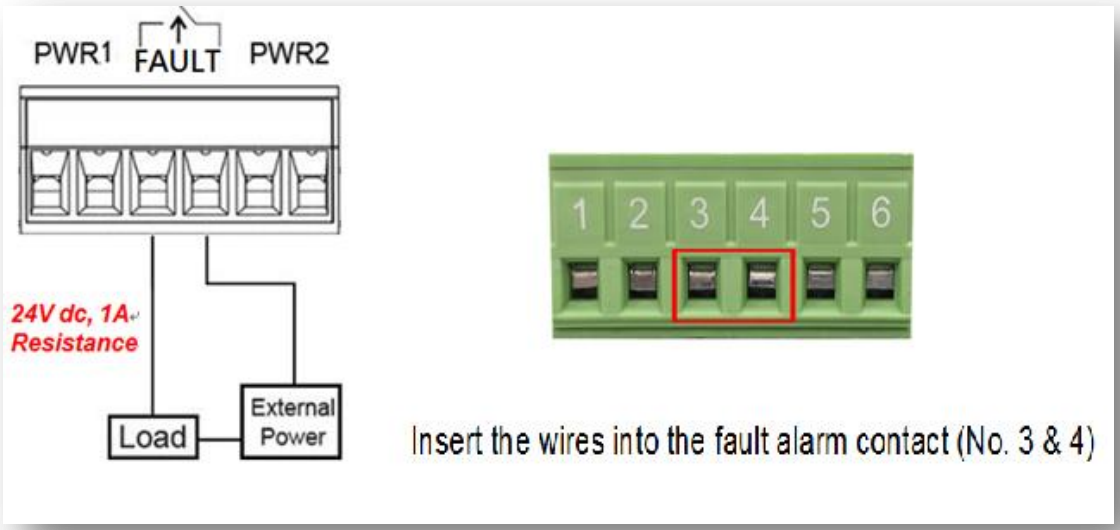

Figure2.8
Wiring the Fault Alarm Contact

Note	• *The wire gauge for the terminal block should range between **12 ~ 24AWG**.* • ***If only using one power source, jumper Pin 1 to Pin 5 and Pin 2 to Pin 6 to eliminate power fault alarm.***

3. Mounting Installation

3.1 DIN-Rail Mounting

The DIN-Rail is pre-installed on the industrial Ethernet switch from the factory. If the DIN-Rail is not on the industrial Ethernet switch, please see Figure 3.1 to learn how to install the DIN-Rail on the switch.

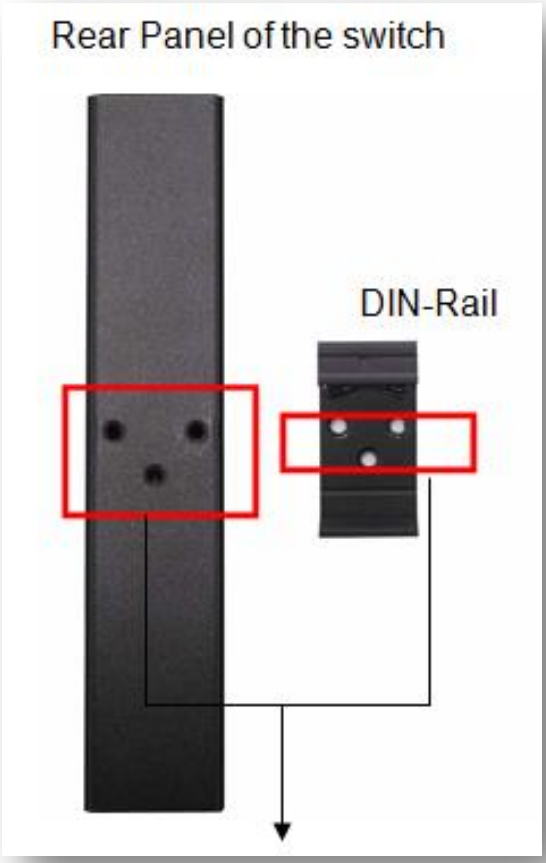

Figure 3.1

The Rear Side of the Switch and DIN Rail Bracket

Follow the steps below to learn how to hang the industrial Ethernet switch.

1. Use the screws to install the DIN-Rail bracket on the rear side of the industrial Ethernet switch.
2. To remove the DIN-Rail bracket, do the opposite from step 1.
3. After the DIN-Rail bracket is installed on the rear side of the switch, insert the top of the DIN-Rail on to the track as shown below in *Figure 3.2*.

Figure3.2
Insert the Switch on the DIN-Rail

4. Lightly pull down the bracket on to the rail as shown below in *Figure 3.3.*

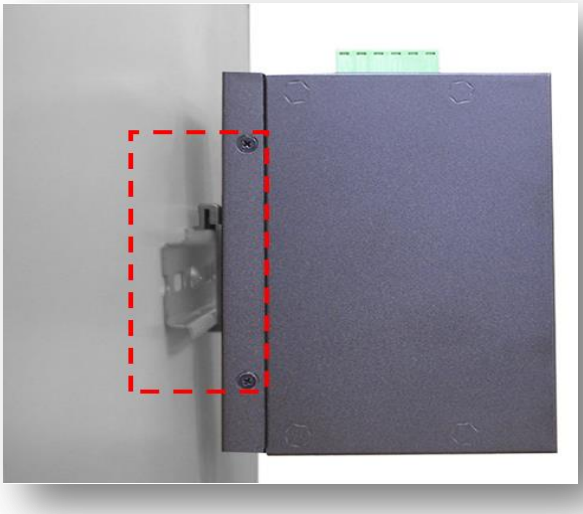

Figure3.3
Stable the Switch on DIN-Rail

5. Check if the bracket is mounted tightly on the rail.
6. To remove the industrial Ethernet switch from the rail, do the opposite from the above steps.

3.2 Wall Mounting

Follow the steps below to mount the industrial Ethernet switch using the wall mounting bracket as shown below in *Figure 3.4*.

1. Remove the DIN-Rail bracket from the industrial Ethernet switch by loosening the screws.
2. Place the wall mounting brackets on the top and bottom of the industrial Ethernet switch.
3. Use the screws to screw the wall mounting bracket on the industrial Ethernet switch.
4. Use the hook holes at the corners of the wall mounting bracket to hang the industrial Ethernet switch on the wall.
5. To remove the wall mount bracket, do the opposite from the steps above.

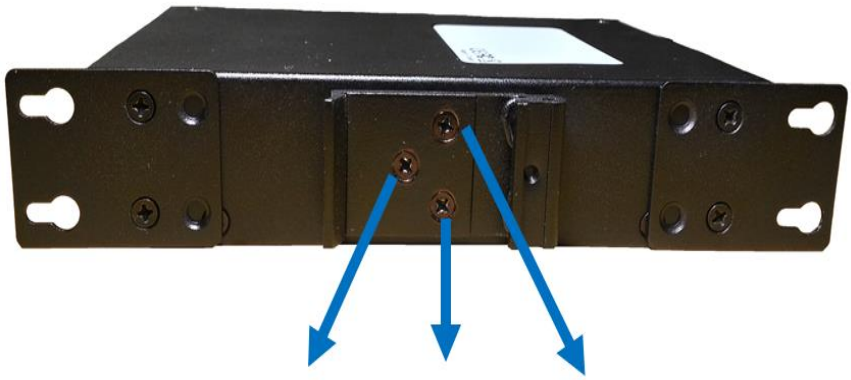

Figure3.4
Remove DIN-Rail Bracket from the Switch

Below, in *Figure 3.5* are the dimensions of the wall mounting bracket.

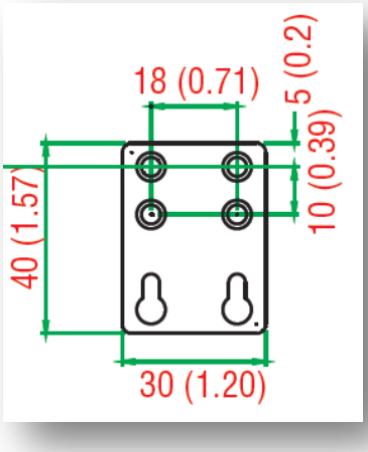

Figure3.5
Wall Mounting Bracket Dimensions

4. Hardware Installation

4.1 Installation Steps

This section will explain how to install Antaira'sLNX-500A series:5-port industrial unmanaged Ethernet switch with 5*10/100Tx.

Installation Steps

1. Unpack the industrial Ethernet switch from the original packing box.
2. Check if the DIN-Rail bracket is screwed on the industrial Ethernet switch.
    - If the DIN-Rail is not screwed on the industrial Ethernet switch, please refer to the **DIN-Rail Mounting** section for DIN-Rail installation.
    - If you want to wall mount the industrial Ethernet switch, please refer to the **Wall Mounting** section for wall mounting installation.
3. To hang the industrial Ethernet switch on a DIN-Rail or wall, please refer to the **Mounting Installation** section.
4. Power on the industrial Ethernet switch and then the power LED light will turn on.
    - If you need help on how to wire power, please refer to the **Wiring the Power Inputs** section.
    - Please refer to the **LED Indicators** section for LED light indication.
5. Prepare the twisted-pair, straight-through category 5 cable for Ethernet connection.
6. Insert one side of the RJ-45 cable into switch's Ethernet port and on the other side into the networking device's Ethernet port, e.g. switch PC or server. The Ethernet port's (RJ-45) LED on the industrial Ethernet switch will turn on when the cable is connected to the networking device.
    - Please refer to the **LED Indicators** section for LED light indication.
7. When all connections are set and the LED lights all show normal, the installation is complete.

5. Network Application

This segment provides an example of an industrial Ethernet switch application (*Figure 5.1*).

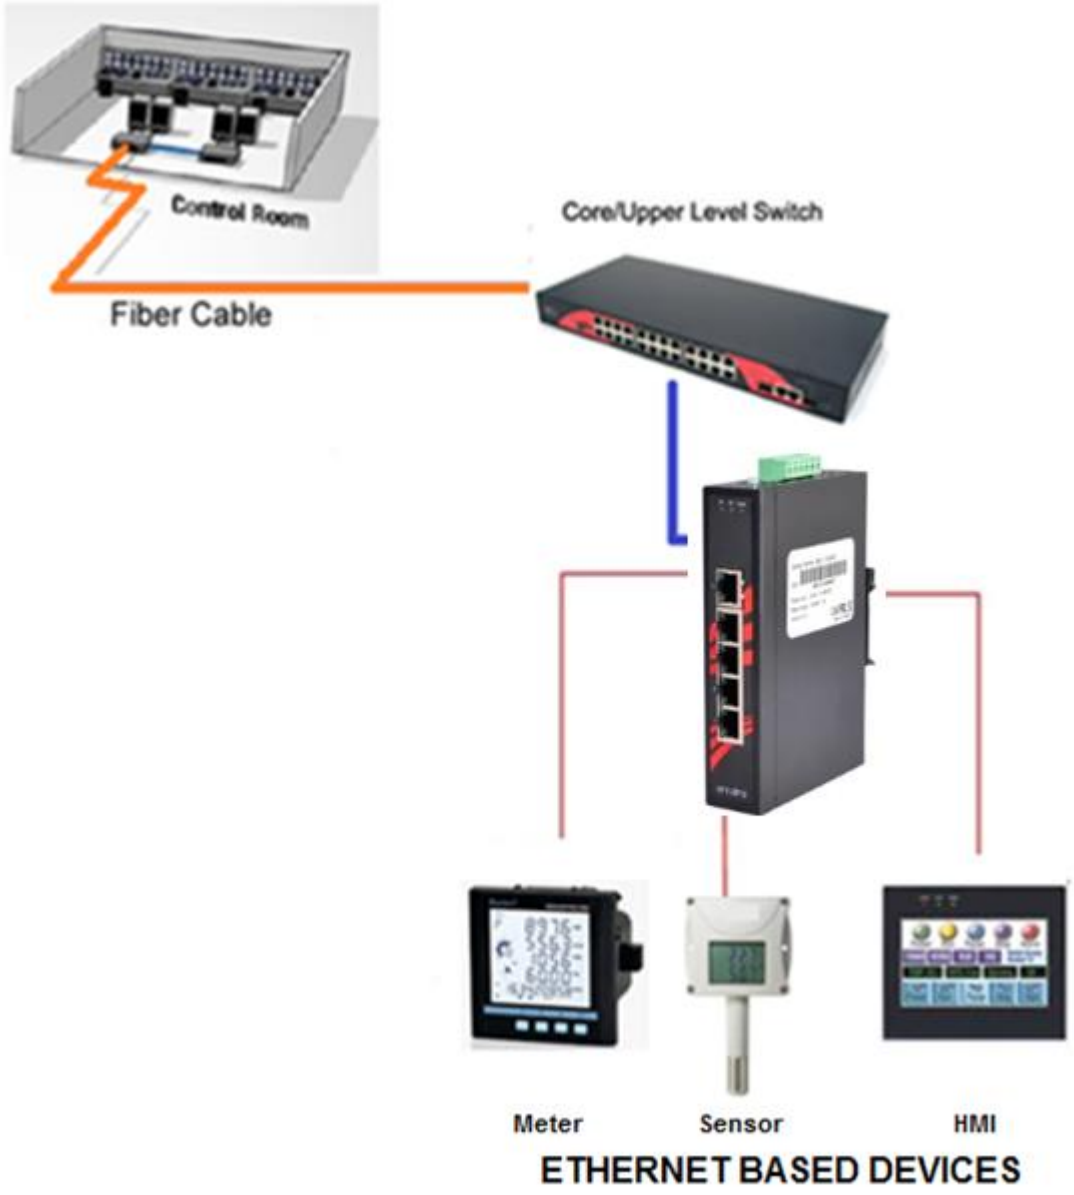

Figure5.1
Industrial Ethernet Switch Application Reference

6. Trouble Shooting

- Verify you have the right power cord or adapter. Never use a power supply or adapter with non-compliant DC output voltage or it will burn the equipment.

- Select the proper UTP or STP cable in order to construct the network. Use an unshielded twisted-pair (UTP) or shield twisted-pair (STP) cable for RJ-45 connections: 100Ω Category 5e for 10M/100Mbps. Also be sure that the length of any twisted-pair connection does not exceed 100 meters (328 feet).

- **Diagnosing LED Indicators:** To assist in identifying problems, the switch can be easily monitored with the LED indicators which help to identity if any problems exist.
  Please refer to the LED Indicators section for LED light indication.

- If the power indicator LED does not turn on when the power cord is plugged in, the user may have a problem with the power cord. Check for loose power connections, power losses or surges at the power outlet.
  Please contact Antaira for technical support service, if the problem still cannot be resolved.

- If the industrial switch LED indicators are normal and the connected cables are correct but the packets still cannot transmit, please check the system's Ethernet devices' configuration or status.

7. Technical Specification

*Table 7.1*has the technical specifications for Antaira's LNX-500A series: 5-port industrial unmanaged Ethernet switch with 5*10/100Tx.

Standard	IEEE 802.3 10BaseT Ethernet IEEE 802.3u 100BaseTX Fast Ethernet
Protocol	CSMA/CD
Transfer Rate	14,880pps for Ethernet port 148,800pps for fast Ethernet port
Transmission Distance	Up to 100M (Fast Ethernet)
Transmission Speed	Up to 100Mbps
RJ45 (Ethernet) Port	5*10/100Tx auto negotiation speed, full/half duplex mode, and auto MDI/MDI-X connection
LED	Unit P1, P2, Fault Tx port: Link/Active, Full Duplex/Collision
Over Current Protection	Slow-blown fuse
Power Input	Redundant power DC12~48Vwithconnective 1*6-Pin removable terminal block
Fault Output	1 relay output
Max Power Consumption	3 watts
Installation	DIN-Rail mounting, wall mounting (optional)
Operating Temperature	Standard: -10°C to 70°C (14°to140°F) EOT: -40°C to 75°C (-40°to167°F)
Operating Humidity	5% to 95% (Non-Condensing)
Storage Temperature	-40°C to 85°C (-40°F ~ 185°F)
Case Dimension	IP-30, 30mm (W) x 95mm (D) x 140mm (H)
EMI	FCC Class A CE EN61000-4-2/3/4/5/6/8/11/12 CE EN61000-6-2 CE EN61000-6-4
Stability Testing	IEC60068-2-32 (Free fall) IEC60068-2-27 (Shock) IEC60068-2-6 (Vibration)

Safety	UL EN-60950
